EVERGREENS - - - Propagators and Growers

TERMS AND INFORMATION

THE SHERWOOD NURSERY CO. are leading propagators and growers of conifers and broad leaved evergreens. Plants can be shipped from our nursery from about October 1, throughout the fall, winter and spring to about May 1. Earlier shipment than May is advised for most varieties.

TERMS:

Our terms are net cash. Note carefully the following conditions:

1. We pay shipping costs on lining out stock to all points in the United States, Canada and Alaska. (Lining out stock for this purpose may be defined as any stock not listed as B&B, specimen, or BR but not including Crimson Thyme, which is not classified as lining out stock).
2. We will reserve stock for future fall or spring delivery when at least one-fourth of the purchase price accompanies the order. Balance C.O.D.
3. At least one-fourth of the purchase price must accompany all lining out orders. Balance C.O.D. Payment in full required on all B&B shipments.
4. The prices quoted are net cash prices but five per cent discount will be deducted from the list price of all lining out stock when delivery is made at our nursery.

Prices on our B&B stock are F.O.B. at our Portland Nursery.

Positively no order for lining out stock will be accepted for less than 25 plants of the same size and variety.

Prices quoted in the 10, 100, or 1000 lots apply to one size and one variety only.

We reserve the right to substitute grades when necessary and the difference is not too great.

Five plants of same variety and size at 10 rate; 25 at 100 rate; 250 at 1000 rate. B&B signifies balled and burlapped. BR signifies Bare Roots.

5. The prices quoted herein will hold throughout the coming nursery year.

PACKING:

No packing charge.

Many small balled grades can be shipped safely, packed BR (Bare Roots) in moss thereby cutting down shipping costs. Where this can be done we have so indicated.

Our method of packing insures the arrival of plants in perfect condition at any place in the United States, Canada and Alaska.

RESPONSIBILITY:

All the stock offered by this Company is grown out of doors and in their own fields with the greatest care and packed in like manner, and we make no guarantee, either expressed or implied, that the plants will grow or give specific results. All shipments are at the risk of purchaser after being delivered to the carrier in good condition. We accept all orders upon condition that they shall be void should frost, storm, crop failure or other cause result in injury or destruction of stock, or in inability to deliver.

SHERWOOD NURSERY COMPANY
141 S. E. 65th Ave., Portland, Oregon

TO REACH PROPAGATING NURSERY:

Drive east on East Burnside to Southeast 73rd Avenue.

Nursery is reached in a fifteen minute drive from the center of city.

General Nursery is located at Sandy, Oregon.

Sherwood Nursery Company pays all shipping costs on lining out stock to all points in the United States, Canada and Alaska. We pay all packing costs. Our terms are net cash. At least one-fourth of the purchase price must accompany all orders, balance C.O.D. Payment in full required on all B&B and BR shipments.

GENERAL LIST

Including Conifers and Broad Leaved Evergreens, Deciduous Shrubs and Rock Plants.

Abelia grandiflora (Glossy Abelia)

Foliage glossy green, flowers white with pink blush. A beautiful, hardy evergreen. Splendid for foundation and mass plantings. Blooms all summer and is an attractive shrub both in flower and foliage. After the flowers have fallen the persistent purplish sepals are still attractive.

	Each	10	100	1000
18-24 inches twice transplanted.....B&B	\$.60	\$ 5.40	\$ 49	\$.....
2- 3 feet twice transplanted.....B&B	.75	6.80	61

Abelia grandiflora sherwoodi (Sherwood Dwarf Abelia)

A dwarf abelia, not only the plant but the leaves and the flowers as well being about half the size of grandiflora. Flowers pink and white, same as grandiflora. Thick-branching and very compact. A choice little plant, especially where space is a factor, supplying a long felt need. Originated by us and has proven a great favorite.

12-24 inches twice transplanted.....	22	176

ABIES (FIRS)

See also *Pseudotsuga* and *Cunninghamia*

Abies balsamea (Balsam Fir)

A conifer of symmetrical, pyramidal growth. Has fairly dense foliage of aromatic properties and believed by some to possess medicinal value. Needles are short and thick. Hardy to Labrador.

6-12 inches once transplanted.....	10	80
12-18 " " ".....	14	112
18-24 " " ".....	16	128

Abies concolor (White Fir)

A tree of symmetrical growth and beautiful bluish foliage. It has great resistance to heat, cold and drought, and these qualities combined with its beautiful landscape effect make it a truly desirable tree in many locations.

Abies magnifica shastensis (Shasta Red Fir)

A stately, symmetrical, bluish green tree of great beauty. Native of the mountains of Southern Oregon and Northern California where it decorates many a high slope or ridge. Branches horizontal in regular whorls. Needles mostly upright, short, close set.

Beargrass—See Xerophyllum

BERBERIS (BARBERRIES)

A native of South America from Chili to Patagonia. Evergreen, reaching a height of about 3 feet. Foliage is deep green, glossy, and compact, and the small, neat leaves are serrated and holly-like. In early spring the plant is a gorgeous mass of tiny, bright, orange-colored flowers. Very decorative.

		Each	10	100	1000
12-18 inches twice transplanted.....	B&B	\$.50	\$ 4.50	\$ 41	\$.....

The above B&B grade can be handled bare roots. If so ordered deduct 10 cents per plant.

Often called Dwarf Box Barberry. Foliage deep green, compact. Hardy evergreen with orange flowers. One of the best low hedge and border plants. Height 18 inches to 2 feet.

6- 8 inches twice transplanted.....	B&B	.40	3.60	32
-------------------------------------	-----	-----	------	----	-------

The above B&B grade can be handled bare roots. If so ordered deduct 10 cents per plant.

A low growing, well formed and gracefully spreading evergreen shrub. Height 2 to 3 feet. Has small, slender, three pronged, hollylike leaves, which are deep green and glossy. Yellow flowers. Very hardy and one of the best of the dwarf barberries.

12-15 inches twice transplanted.....	B&B	.60	5.40	49
--------------------------------------	-----	-----	------	----	-------

One of the best upright barberries. The leaves are large, foliage heavy and the thorns which are long and sharp, are well hidden by the foliage. Some of the leaves remain green through the winter, others turn brilliant scarlet and are mingled among the green leaves in the fall and winter in a most showy and attractive manner.

18-24 inches twice transplanted.....	B&B	.80	7.20	65
2- 3 feet twice transplanted.....	B&B	1.00	9.00	81

Height 3 to 4 feet. One of the new introductions from Western China. The small glossy leaves form a mass of dark evergreen foliage, which turns to a gorgeous red in colder climates. Flowers golden yellow. Flourishes in heat or cold, and is one of the hardiest and best of barberries.

12-15 inches twice transplanted.....	B&B	.65	5.90	53

Bugle—See Ajuga

6-12 inches once transplanted.....	10	80
12-15 " " ".....	12	96

A cone shaped cypress, erect in growth and with vertical foliage of turquoise blue effect. It is a valuable help in landscape plantings, and for that reason is always a popular tree.

Each	10	100
------	----	-----

A narrow pyramid in form, very neat and tidy. Compact in growth with full soft appearing foliage of blue-green color effect. On account of its erect, close habit of growth it is especially well adapted to small homes and grounds where space must be conserved. It is a tree that is pleasing in every detail.

A low flat pyramid, having wonderful green foliage of unusual density. Naturally of shapely form and needing no pruning. Grows to a height of 6 to 8 feet and has a spread considerably broader. Very desirable where neatness and perfection are desired.

Dense golden cypress. The foliage is very heavy, while the tree itself is a broad symmetrical pyramid, branching close to the ground. A trim, handsome ornamental, giving the impression of an individual well dressed and groomed, and with the minimum amount of attention. Golden color throughout the year. Resembles Westermann Cypress. Height 12 to 15 feet or more.

Rather slender golden tree. Foliage erect with pendulous tips toward the top of the tree. One of the most remarkable and most admired of conifers, always attracting attention. Stately in habit, with green and gold foliage of most effective contrast. Hardy.

In color this magnificent tree occupies much the same place in the cypress group that Koster Blue Spruce does in the spruces. Of graceful form and the foliage has a strikingly silvery-blue sheen that makes it outstanding among trees. A rapid grower and perfectly hardy in this climate.

Has a dark bluish green foliage, growing in twisted tufts or whorls and of upright growth. One of the many beautiful forms of the Lawson Cypress.

Genista pilosa (Silkyleaf Broom)

Dwarf, procumbent creeping broom. Neat, tidy, slow-growing and evergreen. Makes one of the most compact and complete ground covers imaginable. Reaches a height of only about 3 inches. Has small yellow flowers and small foliage. Blooms May to July. Besides its numerous other points of merit, it is very hardy. Native central and southern Europe and western Asia.

8-12 inches once transplanted.....	8	72
------------------------------------	-------	-------	---	----

Genista prostrata

The densest and most compact of all creeping brooms. Grows to a height of 18 inches and so completely covers the ground that weeds cannot come through. Branches are small, gracefully fall over the ground, taking root, and so the plant spreads in a solid mass. Remarkably good for covering banks or slopes. Flowers are yellow and plentiful, and the foliage is fine green at all seasons.

12-18 inches once transplanted.....	10	80
-------------------------------------	-------	-------	----	----

Genista radiata

1 to 2 feet in height with flowers of deep yellow. A rounded shrub with odd habit of growth in that the branches radiate at right angles in all directions from the main stem.

30-36 inches spread three times transplanted.....B&B	2.00
--	------	-------	-------	-------

These are fine extra heavy specimens.

Genista sagittalis

A creeping broom reaching a height of not more than 6 inches. Has a profusion of yellow flowers on vertical stems. Stems are flattened and twisted. Always attracts interest and attention, being unique among brooms. Hardest of all creeping brooms. Excellent ground cover making a dense evergreen mat 2 to 3 feet in diameter. Native of western Asia.

6-12 inches once transplanted.....	9	72
24-30 inches spread three times transplanted.....B&B	1.25

The above B&B plants are fine extra heavy specimens.

Genista tinctoria flora plena

Low growing, height about 12 inches, but reaching a spread of 2 to 3 feet. Extremely colorful when in bloom, the foliage being entirely hidden by clustered golden yellow flower heads, standing 5 to 6 inches above the plant. The most profuse bloomer of all brooms. Hardy.

6-12 inches once transplanted.....	9	72
12-18 inches twice transplanted.....	12
24-30 inches twice transplanted.....B&B	1.25	11.20

Small evergreen plants growing 2 to 3 inches high and 6 to 8 inches across. They are covered with enormous, short stemmed, trumpet shaped flowers, 2½ inches or more in length, of the marvelous deep, pure, gentian blue which has no equal in coloring in the entire flower kingdom. Single plants often produce 12 or 15 of the enormous flowers at one time. Plants bloom heavily in the spring and continue blooming less abundantly throughout the season. No small evergreen grows of more charm than the Gentian. Perfectly hardy.

Heather—See Erica, Calluna, Daboecia, Cassiope

The well known, long lived, high climbing or creeping evergreen vine, a very variable species, of which more than 60 varieties are cultivated in European gardens. The Ivy is native in Europe, Africa and Asia. The type which we are offering is the standard variety and the one which is much grown in city parks and in estates. It has few peers for covering extensive slopes, banks or steep terraces in either sun or shade.

A broad leaved evergreen, with every appearance of ivy in bush form, but often having the ivy-like leaves twisted and contorted in an interesting manner. Does well in sun or shade. Reaches a height of 2½ feet and spread of 4 feet. Very hardy and desirable.

Low growing. Leaves crowded, contorted and small, giving a pleasing massed effect, as the plant lies flat upon the ground. Foliage deep dense green. An interesting plant, which attracts much attention and one which makes a dense, compact ground cover. Very hardy.

Huckleberry—See *Vaccinium*

An erect evergreen, 5 to 6 feet tall. Has large foliage and is covered in summer with large bright yellow flowers. Native of China. Hardier than most forms. Rapid growing.

12-15 " " ".....	10	80

A dense, stout dwarf evergreen, of unquestionable hardness. Coming from the high mountains of central Europe it has been dwarfed as trees frequently are that are storm swept for centuries along bleak coast lines or in rugged mountains, and only the hardiest and fittest survive. Such is the selected Mugho Pine, without a peer as a dwarf mountain evergreen. Mature trees reach a height of 4 to 5 feet but having a spread of 6 to 8 feet. It grows with numerous branches and can be kept sheared to small size if desired. Very dense, compact and deep green summer and winter. Our trees are grown from selected seed of the best type and are of very uniform quality.

15-18 " " ".....	B&B	1.15	10.00	93

All of these B&B grades are fine extra heavy sheared specimens. The 6-8 and 8-10 B&B grades can be handled bare roots. If so ordered deduct 10 cents per plant. Thousand rates quoted on request.

The firethorns are famous berry bearers and in this respect have made a rich contribution to home and other beautification. The numerous varieties are nearly all good but *graber* may be regarded as the best. It is the most beautiful berry bearer of them all, producing huge clusters of brilliant red berries in wonderful profusion. Furthermore it has full, fine foliage, and it may be trained into either bush or upright form. It is free from disease. Briefly, it is the greatest berry bearer and has the choicest foliage of the firethorns.

An evergreen common on the chalk hills of southern France. Has decidedly aromatic leaves of grayish or dusty appearance and small light blue flowers much sought by the bees. Fall bloomer. Oil of Rosemary is distilled from the leaves. A fine evergreen, good in dry and rocky or almost any situation. A most excellent hardy hedge plant. Height 2 to 4 feet.

15-18 " " ".....	B&B	.50	4.50	-----	-----

A conifer of majestic bearing. Large, fine foliage. Rears itself to a great height, tapering to a perfect, pointed spire, and has a sturdy, substantial trunk. A rapid grower, and a tree which gives dignity to grounds that are large and ample. Has no parallel in its class.

2- 3 feet twice transplanted.....B&B	1.00	9.00	81
--------------------------------------	------	------	----	-------

The above B&B grade can be handled bare roots. If so ordered deduct 10 cents per plant.

Thuja occidentalis pyramidalis (American Pyramidal Arborvitae)

A most desirable arborvitae of narrow columnar growth, dense and compact without trimming. Very hardy and a favorite in almost any planting. Planted in groups it produces a most impressive alpine effect. In situations where effective hedges are desired requiring but little space, *Pyramidal Arborvitae* has no counterpart. The hedge becomes a solid wall of green from 4 to 20 feet in height and occupies no more than 2 feet in width. For hedges, trees should be planted one and one-half feet apart. No pruning is needed other than topping. A *Pyramidal Arborvitae* hedge requires scarcely any care.

The 2-3 foot grade can be handled bare roots. If so ordered deduct 10 cents per plant.

Thuja occidentalis woodwardi (Woodward Arborvitae)

A dwarf, compact tree, assuming the globe form. Admirably fitted to low plantings, or for shaping taller plantings to the ground. Almost perfectly symmetrical and if at all favorably planted will take good care of itself, and because of its pleasing form and foliage and easy growing qualities will always be in demand.

18-24	" " " ".....	B&B	1.35	12.20

Thuja orientalis aurea nana (Berckmans Golden Arborvitae)

Doubtless the most popular dwarf, golden arborvitae known. Almost globe shaped, very compact, foliage vertical and bright gold. Very formal in appearance. Being a universal favorite and hardy, there are few plantings in which it cannot be used to advantage. It always adds tone and color. Height 4 to 5 feet.

10-12 inches three times transplanted.....	B&B	.80	7.20	65	-----
12-15 " " " "	B&B	1.00	9.00	81	-----

Thuja orientalis beverlyensis (Beverly Hills Arborvitae)

A rapid growing, oriental arborvitae. Foliage good, bright golden color the year round. The tree is usually laden with clusters of small green cones in the fall which enhance its ornamental value. A little pruning keeps it compact and when shaped into a tall stately spire it just fits some landscaping schemes. It is at its best when used as a specimen tree.

12-18 " " ".....	15

Thuja orientalis decussata (Blue Dwarf Arborvitae)

A blue-green arborvitae, having a soft, dense, feathery foliage. Pyramidal in form and adds effective variety in tree grouping.

24-30 inches	three times transplanted.....	B&B	1.25	11.20
--------------	-------------------------------	-----	------	-------	-------	-------

Thuja plicata (Giant Arborvitae)

A native of the northwest, quite generally distributed along the Pacific Coast from Oregon northward and to the westward slopes of the Cascade mountains. The trees are thickly limbed well to the ground except in dense woods, and the foliage is fresh and attractive at all seasons. It is a rapid grower under favorable conditions and grows into a symmetrical pyramid with little or no pruning.

2- 3 feet three times transplanted.....	B&B	1.00	9.00	-----	-----
---	-----	------	------	-------	-------

Thymus serpyllum coccineus (Crimson Thyme)

Dense evergreen carpet, completely covered in spring with crimson magenta flowers, making a solid dazzling mat of royal purple. A marvelous plant. The best of the thymes. For lawn purposes plants should be set about 12 inches apart. One square foot of this sod may be divided into approximately 35 plants.

	Each	10	100	1000
Per square foot.....				50 cents

Thymus vulgaris (Common Thyme)

Small, fragrant, evergreen plant, having a spread of 2 to 3 feet. Leaves are small, and the foliage is so dense that the plants appear as masses of dark green foliage. The flowers are light lavender and grow on numerous spikes 3 to 6 inches in height. An excellent plant for garden borders and rockeries. Grows into a nice, shapely plant in a season or two, and releases its spicy fragrance with the slightest disturbance.

-------------------------------------	---------	---------	-------	---------

Tsuga canadensis (Canada Hemlock)

Native New Brunswick, Wisconsin and south to Alabama. A well known conifer of graceful, pleasing habit of growth, and regarded by some landscape architects as one of the best of conifers. Perfectly hardy, withstanding low temperature without injury to tree or foliage. Foliage is heavy and attractive, needles are short. Is naturally broadly pyramidal in form but can be grown to a rounded head, and lends itself well to pruning into hedges.

6-12 inches once transplanted.....	8	64
12-18 inches twice transplanted BR hedging.....	.35	3.20	27

Vaccinium ovatum (Evergreen Huckleberry)

First discovered by the Lewis and Clark expedition at the mouth of the Columbia river in 1805. One of the great beauties of the plant is the thick, waxy leaves, of blended shades of green in spring and summer, and changing to a mixture of deep crimson and bronze in fall and winter. Its winter and spring colors utterly defy description. It is a rounded plant, many branched and of unusual density. Strong, vigorous grower, and stands unlimited shearing. Can be sheared into a hedge from 1 to 5 feet tall. Does well in either sun or shade, but is at its best in partly shaded exposures. A hardy evergreen shrub of surpassing merit and a fine hedge plant.

10-12 inches twice transplanted.....	B&B	.60	5.40	49
--------------------------------------	-----	-----	------	----	-------

Veronica hectori

A very unusual evergreen with russet green foliage in summer turning to a rich golden color in the winter season. The growth appears in the form of a multitude of symmetrical upright golden spikes, attaining a height of 12 to 15 inches. Makes a fascinating border or low edging plant, and could be used to advantage as a part of almost any low planting. It is a unique type. Hardy.

10-12 inches twice transplanted.....	B&B	.60	5.40
--------------------------------------	-----	-----	------	-------	-------

Vinca minor (Common Periwinkle)

Also called Blue, Running or Trailing Myrtle. Hardy, evergreen, trailing herb. Native to Europe. Has blue flowers. Well known in country gardens. Makes a complete and refreshing ground cover, and thrives with little or no care.

1 yr. once transplanted.....	5	40

Wintercreeper—See Euonymus

Xerophyllum tenax (Pine Lily, Bear Grass, Squaw Grass, or Indian Basket Grass)

A native of the Cascade and Rocky mountains. Grows into a graceful symmetrical bunch in weeping form and might be described as a low fountain in grass, about 18 inches high and 2 to 3 feet across. Out of the center of this grassy bunch grow the tall stems 3 to 5 feet in height and from 1 to as many as 20 in number, crowned with the long creamy-white lily heads of matchless beauty. The leaves which are grass-like are evergreen, and unusual as it may seem, it is an evergreen belonging to the lily family. Mountain slopes and meadows, clad in fields of these lilies are a thrilling picture, which once seen will never be forgotten. The grass is said to have been used by the squaws in early days in weaving baskets. Perfectly hardy, rather slow growing but long-lived. Should be planted in groups, and in the open where it is partially shaded during the day for best results. Will not bloom well if too shaded. The fine bunches of long, silky grass are very ornamental when the lily is not in bloom. A plant with a future, and rare in American gardens.
